Professional Experience

Software Engineer, Brevo

03/2025 – 05/2026
Noida

- Built a highly scalable **DataTable component** using **TanStack Table** and **virtualisation**, enabling seamless rendering of large datasets with high performance across the design system.
- Designed and developed Brevo's org-wide **charts library from scratch** using **D3.js** with fully typed **TypeScript APIs** leveraged AI-assisted development to ship **90% faster**; now adopted by **12+ teams** across the org.
- Built the **AI Chat UI** end-to-end, enabling Brevo customers to complete workflows significantly faster and cutting dependence on traditional web UI interactions.
- Architected a **full E2E testing suite** for Brevo's design system using **Playwright** covering **accessibility**, **screenshot comparison**, and **a11y validation**, fully integrated into **CI** to catch regressions early.
- Built an **autonomous documentation agent** that triggers on every PR merge, auto-detects changed components, updates their docs, and raises a new PR eliminating all manual documentation work and keeping the **design system MCP** always in sync.

Software Engineer, Thoughts2Binary Private Limited

10/2022 – 02/2025
Gurgaon, India

- Significantly contributed to **GraniteStack**, Thoughts2Binary's core SaaS platform, helping achieve a **25% reduction in business costs**.
- Engineered a form rendering engine converting SQL schema input into fully validated forms using Formik and Yup, reducing form development time by **40%**.
- Refined key components using React hooks, Redux, and RxJS, improving render times by **25%** through better state management and memoization.
- Conducted research and assisted new business scoping efforts, resulting in the acquisition of **3 clients**.
- Coordinated with UX/UI designers to transform design mock-ups and wireframes into pixel-perfect web interfaces using React.js and other frontend libraries.
- Mentored 2 junior team members, fostering a collaborative environment that improved code quality and adherence to best practices.

Skills

Front-end technologies: React, Next.js, Redux, TypeScript, JavaScript, Tailwind, Storybook, D3.js, TanStack, ReactFlow

Backend technologies: Node.js, Express, MongoDB, Mongoose, Redis, Socket.io, WebSockets, JWT Authentication

Testing frameworks: Playwright, Jest, React Testing Library, Screenshot Testing, Accessibility (a11y) Testing

DevOps: AWS (EC2, DynamoDB, S3), Docker, CI/CD, GitHub Actions

Other: Performance Optimisation, AI-assisted Development, Agentic Tooling,

Projects

Mondayboard.online

Comprehensive task management solution.

- Developed a comprehensive task management system allowing users to create, update, and delete tasks seamlessly.
- Real-time notifications and updates for seamless team collaboration using **WebSockets**.
- Focused on robust **security features**, integrating user authentication with **JWT**.
- **Tech Stack:** Next.js, TypeScript, Node.js, MongoDB, and Mongoose, WebSockets.

Workspaces

Collaboration platform inspired by Gmail.

- Collaboration platform inspired by Gmail's efficiency.
- Intuitive email system with real-time chat and group system.
- Seamless transition between emails and chats and real-time chats creating a unified workspace environment.
- **Tech Stack:** React, JavaScript, JavaScript libraries, HTML, CSS, Node.js, MongoDB, and Mongoose. Material UI

Education

Bachelor of Computer Application, Invertis University

2018 – 2021
Bareilly, India

Cources And Certificates

Data structure and algorithms with Web development, Pepcoding Education Private Limited
